How much effort do you give?

Il marchio 100% è sempre stato sinonimo di motocross

Le radici del marchio 100% risale ai primi anni 80 quando il logo abbelliva l'attrezzatura di gara dei maggiori fenomeni del motocross. Trent'anni più tardi la passione per lo spirito delle competizioni rimane inalterato. Oggi il marchio 100% ispira una nuova generazione di piloti e pone loro la stessa domanda: "How much effort do you give?" Quanto impegno sei pronto a metterci?

Disponibile in 50 paesi e nei cinque continenti

Quando sei in moto, il guanto non è solo un accessorio, dice alla moto come ti senti. Che tu stia sorpassando, frenando quando raggiungi una curva, o spremendo fino all'ultima goccia la potenza dal motore, il guanto è responsabile di così tante decisioni che può influenzare le prestazioni della tua moto e la tua sicurezza.

Ecco perché l'unico obiettivo di FIVE è quello di sviluppare e produrre i guanti più avanzati al mondo, utilizzando tecnologia all'avanguardia e attingendo dalla nostra vasta esperienza nel mondo delle corse.

Corone in Acciaio

L'alto di gamma secondo SUPERSPROX.

Pensavi che tutto fosse stato detto sulla corona in acciaio? Allora guarda una corona in acciaio SUPERSPROX e giudica tu stesso: guardarla è essere convinti!

Progettazione al computer per un taglio laser, trattamento termico, finitura anticorrosione ad alte prestazioni.

Pignoni

Acciaio ad alta resistenza trattato "SCM45". Pignone forato per una maggiore leggerezza e dentatura auto-pulente.

Confezione blister apribile con etichetta informativa sull'applicazione dedicata.

Corone in Alluminio

Cerchi soprattutto leggerezza? La corona in alluminio SUPERSPROX soddisferà le tue aspettative. Utilizzando alluminio 7075 T6 noto per la sua resistenza e leggerezza. Progettata specificamente per la corsa.

Corone Bi-Metalliche

STEALTH, l'originale, l'unica.

Protetta da brevetto, più leggera dal 10 al 50% rispetto a una corona in acciaio tradizionale (a seconda del modello), con una durata di vita tre volte superiore rispetto a una corona in alluminio standard, la corona SUPERSPROX STEALTH è progettata per condizioni di guida estreme in cui le corone in alluminio tradizionali non sono in grado di sopportare coppie motrici potenti.

CATENE

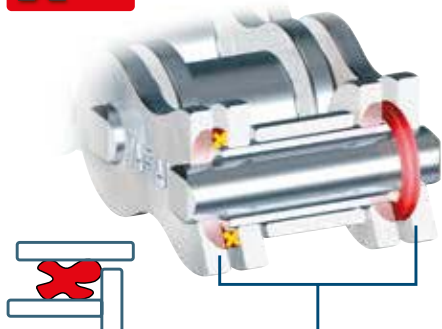

D.I.D.[®]

Le catene D.I.D

D.I.D ha la più lunga esperienza nel settore dell'equipaggiamento originale.

La catena D.I.D X-Ring[®]

Leader nel campo delle catene ad alte prestazioni, per una minima frizione e una durata superiore. Metà delle perdite di potenza rispetto a una catena O-Ring normale.

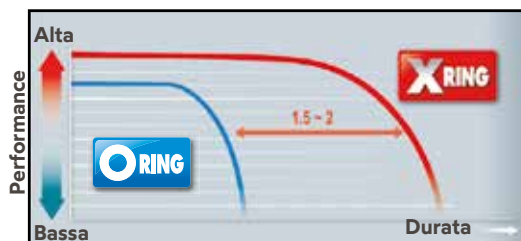

L'azione di torsione del X-Ring disperde la pressione e minimizza la perdita di potenza.

La perdita di potenza è ridotta della metà.

La costruzione del giunto X-Ring[®] brevettato DiD riduce gli attriti piegandosi tra le piastre laterali anziché essere schiacciato.

Performance delle catene X-Ring[®]

I quattro punti di contatto del X-Ring conferiscono una tenuta perfetta. Ciò impedisce all'umidità di penetrare e garantisce la lubrificazione.

COME CREARE IL CODICE PER UNA CATENA DID

- > I codici SGR per le catene DID sono composti da 9 cifre.
- > Le prime 5 cifre indicano il Modello della Catena:
Esempio: Catena DID 520 ERT3 = 53303
- > Le 3 cifre che seguono indicano il N° di maglie:
Esempio: Catena DID... da 120 maglie = 53303 120
- > L'ultima cifra indica il Tipo di giunzione.
La cifra "1" indica la maglia di giunzione a Clip, la cifra "2" quella a Rivetto.
Esempio: Catena DID... con rivetto = 53303 120 2

Kit cuscinetti e parapolvere ruota

I cuscinetti delle ruote delle moto fuoristrada hanno, in genere, vita breve per colpa delle infiltrazioni di acqua e di polvere che ne minano la durata. I cuscinetti All Balls sono stati sviluppati in collaborazione con la KML specificatamente per le attività motoristiche off-road. Il doppio labbro di gomma del cuscinetto tiene lontano l'acqua e lo sporco e consente una migliore ritenzione del grasso. I kit cuscinetti e parapolvere per ruota All Balls includono tutti i cuscinetti e le guarnizioni necessari per rigenerare la ruota.

Kit distanziali per ruota

Nell'uso fuoristradistico delle moto, acqua e sporco si frappongono tra la guarnizione e la superficie di accoppiamento del distanziale ruota. Ciò provoca delle scanalature che con il tempo causano la perdita di tenuta delle superfici e consentono ad acqua e polvere di accedere al cuscinetto causandone la perdita di efficienza. In linea generale i distanziali ruota di primo equipaggiamento delle moto da fuoristrada si deteriorano nel giro di un anno di uso della moto. Per tale motivo devono essere controllati e sostituiti se necessario ad ogni sostituzione dei cuscinetti ruota.

Tabella Applicazioni Kit Forcella

Kit paraolio, parapolvere e revisione forcella

kit paraolio e parapolvere, per forcella, All Balls hanno un design unico a 3 labbra che ripartisce uniformemente la pressione, riducendo così la temperatura di lavoro, l'attrito e l'usura.

Gli elastomeri utilizzati sono testati per durare molto di più di quelli di primo impianto, Durata media dalle 3 alle 5 volte superiore rispetto alle guarnizioni di primo impianto.

Riduzione dell'attrito del 50%-60% rispetto alle guarnizioni di primo impianto.

Il minore attrito comporta una durata superiore!

Tabella Applicazioni Kit Forcellone, Leveraggi e Mono

Kit revisione forcellone

I kit revisione forcellone All Balls contengono tutti i cuscinetti, le boccole e le guarnizioni necessarie per riparare e ripristinare la funzionalità ottimale del vostro forcellone. I cuscinetti sono prodotti con l'uso di acciaio AISI 51200 per le maggiori prestazioni lunga durata. Le rondelle con rivestimento in teflon D, in alternativa ai cuscinetti ad aghi di spinta, offrono una superiore resistenza allo sporco all'acqua e alla mancanza di lubrificazione.

Kit revisione leveraggi

I kit All Balls per revisionare i leveraggi comprende tutti i cuscinetti, gli alberi, le guarnizioni e le boccole per rigenerare i leveraggi del porcellone secondo le specifiche del produttore.

Kit revisione mono superiore e inferiore

I kit revisione mono superiore ed inferiore All Balls sono progettati per sostituire le boccole e i cuscinetti usurati del monoammortizzatore e per agevolare un migliore funzionamento dello stesso.

Principali caratteristiche:

- Pronta all'uso e facile da installare
- Nessuna manutenzione e maggiore sicurezza
- Maggiore potenza e durata
- Elevata resistenza alle vibrazioni
- Installabile in tutte le posizioni
- Basse emissioni di gas
