www.ebcbrakes.com

As they say quality never goes out of style... and EBC is the perfect example of that... 40 years as industry leader as the market changes and supply issues arise, NO supply issues for EBC... and EBC goes from strength to strength.

Here's why EBC beats them all

In house press-works for backing plates - millions per year

- NRS hook system on all organic backing plates for perfect bond strength
- In house production of all Organic and sintered brake pads all with R90
- Two massive auto load In house high powered Lasers for endless supply of rotor components again R90
- New centreless grinders for perfect rotor componentry, flat smooth and precise within microns
- In house multi line skin packaging, boxing and flow line shipping facilities

Lets remember - EBC Brakes make 100% of the motorcycle brakes it sells IN HOUSE

On distribution EBC are one of a tiny few companies who has "Kept the Faith" as EBC Brakes continues its tradition of Distributor only sales allowing those Distributors to fill orders to the dealer network.

The reason we don't need to change recipe that is because it works !!!! It works for the distributors, it works for the dealers and it works for us as a factory.

As EBC continues to grow and expand globally we have welcomed numerous new overseas importers for new markets but in Europe and USA our distributor network has remained stable and we really appreciate the loyalty and business support that our fantastic distributors have given us through their dealers...long may it continue.

Thanks again to you all for your support.

MOTORCYCLE BRAKE PADS

Aramid Fiber Organic FA Series Pads

FA series organic brake pads will deliver fingertip stopping power and superb brake feel and control, the preferred choice for many sportbike riders. This compound has low disc attack characteristics and gives medium lifetime.

“X” Pads

“X” series Motocross sport and enduro pads, cool running based pad compound for sport use in Motocross and ATV applications. For mud, sand or wet conditions requiring longer life, use our sintered range below.

Double-H™ Pads

FA series with HH suffix, EBC’s American-made ultra high friction Double-H™ sintered copper alloy brake pads for maximum stopping power and lifetime. With stainless steel radiator plates to reduce heat transfer and double compact for wider pads.

MXS Series Pads

“MXS” Motocross race pads, ultra high friction American-made sintered copper alloy with diamond ground surface finish for fast brake-in. With external hex drive slider pins, these pads are suitable for all fast Motocross riding.

“R” Series Pads

“R” series American-made sintered copper alloy ATV and Motocross replacement pads for sport and utility off road riding.

SV Pads

“SV” series severe duty ATV pads, high density copper alloy for longest possible life in utility applications on ATV, especially in wet, mud, dust and dirt conditions.

MOTORCYCLE BRAKE PADS

EPFA Trackday Pads

EPFA trackday pads give long life in street use with improved fade resistance and heat cycling plus improved noise characteristics, making this a great pad for heavy streetbikes and cruisers as well as faster superbikes. Great for intermittent track use.

GPFX Race Series Pads

GPFX vacuum sintered ultra-high friction race pads are for sportbike asphalt racing and have been refined over the years to deliver one of the best brake race materials ever made. See page xii for full details.

SFA Organic Scooter Pads

A superb general replacement pad for urban use on scooter mopeds, mofas, mokicks and mopeds. Made using aramid fibers, these pads give above average lifetime, reduced rotor wear characteristics and offer great value for money.

SFA-HH Sintered Scooter Pads

These American-made sintered scooter pads are long lasting with high performance HH rated stopping power for perfect braking - wet or dry. The HH pads target the faster and heavier scooter market and work well with stainless steel brake discs.

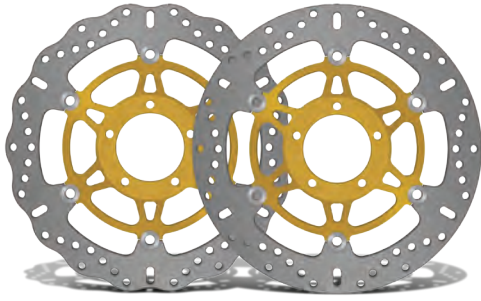

V-Pads

Semi-Sintered V-Pads™ are a new blended Semi-Sintered brake pad that combine the highest qualities of an organic brake pad with the endurance of a sintered equivalent brake pad. The Vee brake pad range are designed for the heavy cruiser/streetbike market as a replacement brake pad.

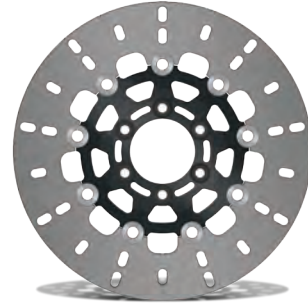

MOTORCYCLE BRAKE ROTORS

X and XC Series Sportbike Rotors

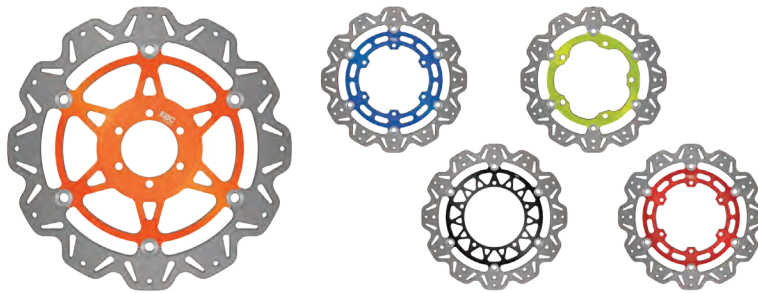

X and XC series rotors feature mill hard stainless steel high friction rotor blades for maximum brake effect and are direct size for size replacements for OEM rotors. These rotors feature our patented SD system square drive button system.

VMD Classic Style Rotors

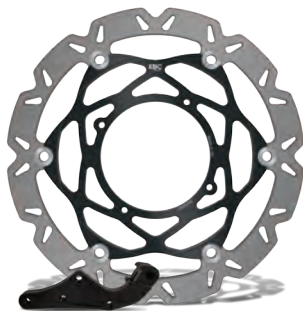

These black anodised vintage rotors are new to our range. The vintage fitment benefits from billet aluminum construction; lightweight, less unsprung weight enables better handling and stopping power. Perfect for the Café racer scene.

Sportbike VR Series Rotors

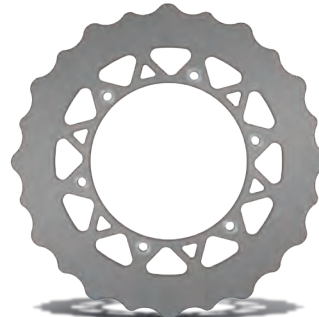

Vee profile lightweight rotors with alloy hubs and ground stainless steel rotor blades for fast street bikes. Choose from black or colored hub options as shown above. To order prefix with VR and suffix with chosen color BLK, RED, BLU, GRN, GLD. For rear rotors just the VR number.

Supermoto Brake Rotor

SMX rotor with vee design contoured rotor, 320mm rotor upgrade kits complete with relocation bracket.

Cross Country Rear Brake Rotors

Made in the UK from German milled rolled, heat treated stainless steel. These rotors have no drill pattern in the pad track which improves pad wear, prevents mud and debris being dragged between the pad and disc. Ideal for cross country competition in all conditions, use with EBC Brakes sintered MXS or R material brake pads.

MOTORCYCLE BRAKE ROTORS

MD Series Stainless Scooter Rotors

Made from mill hard rolled steel, these rotors are machined to match the original units, mechanically de-stressed to avoid rotor distortion, surface finished for precise smoothness and then zinc coated to prevent corrosion or rusting.

VR Series Stainless Scooter Rotors

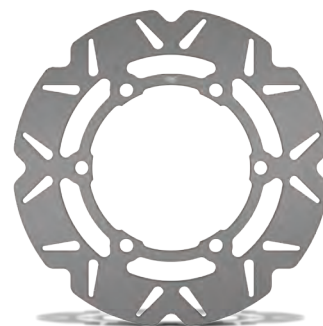

Made in the UK using German mill rolled heat treated and precision ground stainless steel, the new VR profiled scooter sport rotors are the lightest and best looking on the market and can be used with any type of brake pad.

UTVX Rotors for ATV//UTV

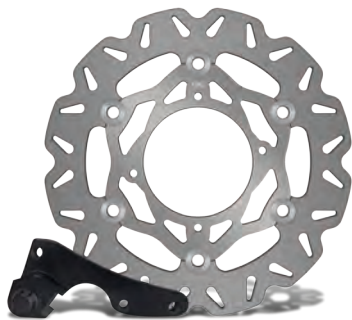

These rotors look great and give an improved brake performance. Made in our British manufacturing facility using durable, tough German mill rolled stainless steel, heat treated & diamond ground to give great braking for less than OEM prices.

CX Extreme Off Road Rotors

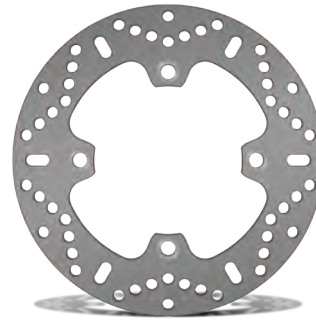

CX Extreme self-cleaning lightweight stainless rotors are a size-for-size replacement/upgrade for front and rear fitment on all modern motocross machines.

Oversize MX Rotors

250 or 280mm motocross oversize rotor kit complete with billet aluminum relocation brackets for improved braking performance and modulation with vee design rotor.

Rear Brake Rotors

Made from stainless steel and available in full circle or contoured profile, suitable for performance street use or racing with new lightweight hole pattern construction.

ROTOR BOLT KITS

All manufacturers recommend new rotor bolts when replacing brake rotors on a motorcycle. EBC Brakes have a range of brake rotor bolt kits available to purchase with all new EBC Brakes rotors.

Our Rotor Bolt Kits are produced to fit individual motorcycle models (refer to Catalogue for model listings). MOTORCYCLE CLUTCH OPTIONS

CK/CKF Series Clutch Kits

CK complete engine sets of stack height controlled friction plates feature the EBC Brakes' unique alloy particle impregnated clutch facings that prevent burn up or slippage. CKF carbon fiber impregnated kits for ATV and Motocross use are built to last longer, grip and feel better than cork kits.

DRC/DRCF Series Clutch Kits

DRC is the ultimate clutch rebuild kit for your ATV and Motocross machine. The DRCF kit swaps the stock type cork friction plates for a set of severe duty carbon fiber lined friction plates for better heat and wear abilities.

SRC/SRK Series Clutch Kits

SRC is an aramid fiber lined plate set with heavy duty clutch springs (diaphragm type springs included where required). Ideal for heavy sport bikes, faster riders and production based race use. SRK series includes a full engine set of aramid lined friction plates with clutch springs and steel separator plates.

CSK Coil & Diaphragm Clutch Kits

CSK sets include either coiled springs or diaphragm springs where appropriate. Coil springs are spiral wound with 4 to 8 pieces per set, made from heat treated high carbon steel delivering the right tension for your bike. Diaphragm springs are dish shaped flat steel pressure rings.

Clutch Removal Tools

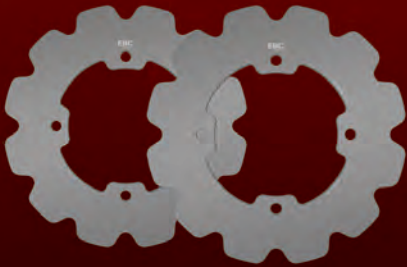

Made in the UK by EBC Brakes, these laser cut clutch tools make clutch removal, loosening of the drive shaft bolts and re-tightening a breeze, without any fear of damage to your expensive clutch basket. Tools can be extended to create more leverage if required with any simple workshop tool or tube. EBC Brakes produce a clutch tool for almost every clutch plate design known.

Dyno Graph

These pads bed in fast and deliver extremely high friction linear performance in track use. GP FAX pads are high friction but highly stable in stop. This means pads are powerful and predictable time after time when the brake is applied in race use. The “in-stop” friction fall off is almost zero and can hardly be noticed at the lever, meaning the brakes offer superb control. The EBC dyno is set to duplicate race conditions at the Road America race track and represents a true simulation of race brake demand. The number of race teams using GP FAX grows annually and for 2022 the exact same formulation developed through 2019 is used again.

EBC pads are developed in our own laboratory and tested using this race track simulator dynamometer to guarantee perfection before being thoroughly field tested on dozens of race teams.

This symbol indicates a rotor made of billet steel, and should be only used with EBC FA Organic or Vee pads.
 SAFETY NOTICE - With vehicles primarily designed for off highway use such as quads now being used on the highway, we would recommend the use of X or MXS pads for highway use and ONLY using the R and SV higher density / harder pad series for off road riding.

BRAKE LINES

EBC Brakes braided brake lines are manufactured in Great Britain from the highest quality materials, with braided stainless steel PTFE hose and grade 303 stainless steel precision machined fittings. At EBC Brakes we do not use mild steel or aluminum components in our brake lines, instead we choose stainless steel for every fitting, as this material offers maximum quality in terms of strength and corrosion resistance. EBC brake line kits are supplied 100% complete and include brand new stainless steel bolts for maximum visuals.

EBC Brakes braided hoses fit many bikes in front, rear and race designs. Braided hoses improve brake pressure transfer to the caliper and disc pads, they help improve lever feel and reduce "bulging" which may happen with standard rubber hoses. Braided hoses are also more resistant to abrasion or cuts common with off road riding and thereby improve safety.

EBC brake lines are designed and built to last, that's why every line is offered with a lifetime warranty. Every individual line is pressure tested after assembly and as an absolute guarantee of quality, EBC brake lines are manufactured to Federal Motor Vehicle Safety Standards (FMVSS-106) and have the following approvals: DOT, TÜV, ISO9001, DEKRA, ARAI, CQC AND ADR.

BLM is our standard braided hose series whereas BLMR series race hoses have fewer lines and are the choice for track and performance use giving an even firmer lever feel and improving service time. Racing kits take the shortest route from the master cylinder to the caliper. The lines usually bypass any Y-splitters in the existing system, this reduces the number of places where the brakes can leak. The two lines from the master cylinder are a lot easier to bleed than a system with a Y piece as each line bleeds independent of the other whereas with a Y piece they don't until fluid is below the Y piece.

Hose numbers are suffixed with a number and letter designating the number of hoses in the kits and front or rear, for example;

- BLM6038-1F is a kit with a single hose for front fitment
- BLM8111-3F is a kit with three hoses for front fitment
- BLM8113-1R is a kit with a single hose for rear fitment
- BLMR8114-2F is a race kit with two hoses for front fitment.

We do not sell BLMR race hoses for rear fitments, only front.

Some kits are sold as complete bike sets only and examples of numbering are:
BLM8169-4FR which is a four hose kit for a complete bike (front and rear).

All motorcycle brake lines (except Harley) are supplied with black stainless fittings, clear hose and red/blue EBC Brakes heat shrink.

HARLEY-DAVIDSON® BRAKE LINES

EBC Harley-Davidson® lines are supplied in a unique finish, with chromed stainless fittings, black hose and black/space-grey EBC Brakes heat shrink. Additionally, where many competitors use 'off the shelf' components, EBC Harley-Davidson® lines are manufactured using our own bespoke design of chrome plated hardware and brackets, ensuring perfect fitment for complex Harley-Davidson® brake line assemblies.

MOTOCROSS AND OFF-ROAD BRAKE LINES

EBC Brakes motocross and off-road brake lines are supplied with a hardened plastic sheath around the lower portion of the hose, to provide additional protection against damage which could otherwise result from the harsh and unforgiving conditions of off-road terrain. These brake lines are built to withstand a lifetime of off-road abuse, ensuring high performance and safe riding for the lifetime of the vehicle.

Making Precision Pilot Jets

Everyone knows how sensitive an engine is to pilot jets in the acceleration stages from 1000 to 3500 rpm and getting fuel mixture right in this area is critical. For this reason jets have to be perfectly accurate in their marked size and incremental size steps. EBC Brakes' sister company A-BAX Precision Engineering Ltd in the UK has purchased the most accurate machine on the planet for this work shown below. A-BAX Precision Engineering Ltd pilot jets are precise, clearly marked and reliably gauged using pin gauges, accurate to one tenth of a thousandth of an inch, you can rely on their accuracy.
